

Smart Sat Connect

This Revez Combo receiver allows you to receive HD Satellite channels and Saorview channels. You will need to use a 60 cm dish (sky dish) and UHF aerial (for Saorview service).

Use one remote control to control both services. Receiver has PVR function (manual recording, recording from timer, recording from EPG, timeshift) when you connect an external hard drive via USB port.

With an external hard drive add on you can record Satellite (UK channels) and watch Terrestrial (RTEs) same time or other way. It also has some media player functions built in.

<p>What TV services and channels will I be able to watch?</p>	<p>You will be able to watch a broad range of the most popular free channels from the UK via Freesat, and from Ireland via Saorview. The package includes RTE HD, BBC HD, ITV HD, Channel 4 HD etc..</p>
<p>Are there any differences between this box and the Ariva combo box ?</p>	<p>The main difference is the size, the Amiko box is small and neat and can even be hidden behind a TV using the supplied remote control link. Both boxes show the same channels from Ireland and the UK</p>
<p>Are there any monthly or yearly charges ?</p>	<p>There are no recurring monthly or yearly charges as Saorview and Freesat channels are broadcast free to air . You simply pay a one off fee for the equipment and installation.</p>
<p>Can I record and pause live TV using this receiver?</p>	<p>Yes, this receiver will allow you to pause and also do timed recordings of programs. It doesn't contain its own hard drive though, so you'll need to save the programs on either a USB stick or USB hard drive and we can also supply a hard drive as an option above. While you are recording a Saorview programme, you'll be able to watch a satellite channel, and the other way round.</p>
<p>Why people buy this item?</p>	<ul style="list-style-type: none"> Can Show Saorview HD channels Can Show Freesat HD Channels One channel list for Irish & U.K. TV View over 140 channels in Ireland & U.K. Has 7 day guide for Saorview Now and next guide for Freesat Can record to USB device Record Freesat when watching Saorview
